"RS" D. B.....	11.84	12.62	14.04	16.90

Easyon Galvanized Strap Hangers

The new Easyon Eaves Trough Hanger, in addition to having many application advantages, is an unusually strong and well constructed Hanger.

It is made of galvanized steel, and is thoroughly reinforced at the usual point of wear—in other words, where the stem and hanger meet. Here you will note that the stem as well as the cross-piece is reinforced, and a very heavy clip applied under machine pressure holds them securely.

	Style "A"		Style "B"	
	S. B.	D. B.	S. B.	D. B.
4 inch.....	\$7.68	\$ 8.64	\$8.28	\$ 9.24

New "Perfection" Cut-Offs

The Only One-Piece Cut-Off on the Market
Collar Tongued on before Galvanizing.

All connections are interlocked and cut-off is regalvanized after assembling. Note the spring that holds the valve.

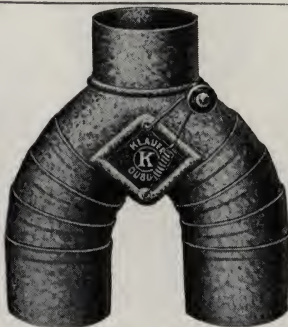

Round Corrugated

All Klawer cut-offs are substantially made, although there is no noticeable difference in the strength of these three patterns. The corrugated round may prove the strongest by virtue of its pattern being round and corrugated.

Plain Round

The same basic construction features are embodied in all of the patterns on this page. One outstanding common sense feature is the spacing of the branches of the cut-off. This spacing is ample to admit soldering without inconvenience.

Square Corrugated

Cut-off lever and valve are of practical design. The substantial spring holds the valve in place against the down thrust of water. The high collar is interlapped or seamed into position and hot galvanized after assembling, assuring a substantial one-piece cut-off.

Basically the quality of any fabricated metal product must be represented in the metal itself. All Circle "K" products are manufactured from metal of special weight and characteristics for the purpose it must serve. This careful selection . . . plus practical, experienced designing ability . . . plus fine, accurate workmanship on Klawer "precision" machinery . . . make Klawer products easy to install, efficient in service and economical to own.

Tin Plate in Rolls

For Roofing, Gutters, and Valleys

Made entirely from prime sheets, heavily soldered, using rosin flux. No Waster Plates used in any of our Roll Tins.

Price per 100 lineal feet Double Cross Locked.

See Page 2 for freight allowance.

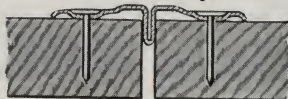

Our new type Building Corners in all sizes are now furnished plain, not beaded.

Packed 250 per Carton.

Metal Batten Strips

"V" Pattern Style "A"

When the Lumber Swells

These new type batten strips made in two patterns, "V" shown above and the "Ovolo" shown at the bottom of the page. The special shaping of these batten strips is a recent development that is unusually practical. The lumber can warp or shrink as the seasons change without tearing out the nails and causing a general loosening of the strips.

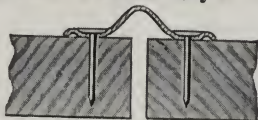

Price, per 1000 feet.....\$23.00

When the Lumber Shrinks

Both styles crated 500 or 1000 feet per crate of each length. Less quantities 10% extra.

"Ovolo" Pattern Style "B"

When the Lumber Swells

These two patterns of batten strips offer resistance to weather and vermin. This batten is economical, easily applied and everlasting. The nail holes are countersunk, and as indicated above, the shaping of the strips is such that the expansion and contraction of the wood are not then stripped out of position or tear out the nails.

Price, per 1000 feet.....\$19.00

When the Lumber Shrinks

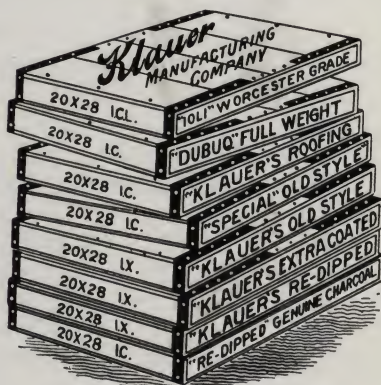

6, 7, 8, 9 10 and 12 foot lengths.

Special Nails for applying Batten Strips 22c per lb.
Freight allowed on shipments of 1000 feet or more.

When invoicing, the Chicago rail rate of freight to destination is added and full freight is allowed from Dubuque, Iowa.

All shipments made from Dubuque.

1 $\frac{1}{4}$ Inch Corrugated Roofing Non-Syphoning

Syphoning, due to capillary attraction, may cause leaks with ordinary Corrugated Roofing. Non-Syphoning Roofing has a special cup-like channel on the corrugation near one edge of each sheet. This channel acts as an air-gap and prevents syphoning. Capacity of channel is sufficient to carry off any water that may seep or be blown through the laps.

Prices per Square

28 Gauge, Galvanized....\$ 7.60 26 Gauge, Galvanized....\$8.32

Sheets are 26" wide and cover 24" when laid and lapped in usual manner. Full width charged for. Regular lengths 5 to 10 feet inclusive. 11 and 12-foot sheets supplied at a net extra charge of 10c per square in all gauges.

All shipments made from Dubuque.

Corrugated Elevator Siding

This siding is designed for grain elevators, warehouses, mills, barns, etc.

Furnished in any gauge, 32 inches long. Sheets are laid with a 2-inch end lap and are nailed 2 inches above the upper edge of the lower sheet, thus allowing the sheets to slip two inches in every thirty-two inches as the sides of the building settle.

For price of either 1¼" or 2½" Corrugated Galvanized Elevator Siding, add 30c per square for 29 and 28 gauges and 35c per square for 26 and 24 gauges over price of 2½" Corrugated Sheets. These extras are net.

Nailseal Roofing

NO NAIL HEADS EXPOSED AT THE JOINTS

IT CAN'T LEAK

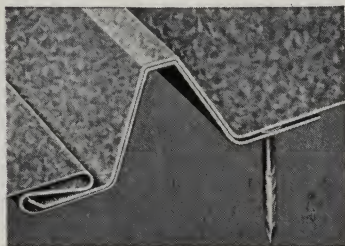

Now that "Nailseal" roofing is perfected, it seems strange that this innovation in roofing did not take place several years ago. There are a great many points of advantage to this new roofing; one in particular being ease of application. Heretofore, laying metal roofing required special tools to work it with—it usually required two men to make an application—now with "Nailseal" it is a one-man job.

The sheet which is being brought down into position will lock the joint and seal up the nail head that holds the under sheet.

IT'S EASY TO LAY

There isn't a possible entry for water through or around the joints of "Nailseal" roofing. Overlapping seams offer two thicknesses of metal that are interlocked, and the metal at the joints is formed in such a way as to offer a drain channel to whatever water might get under the first lap. Note in the illustrations how the sheets interlock into position and seal the nail heads.

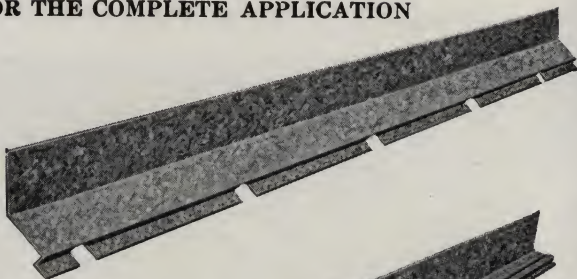

Illustrating the drain channel two thicknesses of metal, and the nail head of the first sheet completely covered by the second.

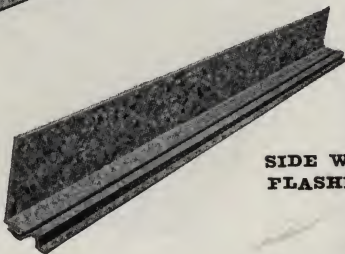

Sheets are 24 inches wide, will cover that width and are charged for on that basis.

Made only from COPPER BEARING STEEL Sheets

STORMSEAL ROOFING

STORMSEAL is economical roofing. Some roofing requires expensive, closely spaced decking. With STORMSEAL you can take advantage of an economical open framework.

Strength and permanence are two qualities which make STORMSEAL a better value. The rigid, self-bracing design, including the Tension Curve, makes each sheet lay flat against the decking—adding to its strength and preventing rattling.

There is no waste in lapping and no difficulty in estimating the number of sheets required as each sheet of STORMSEAL has an actual covering width of 24 inches.

Prices Based on Covering Width.

5 ADVANTAGES OF STORMSEAL

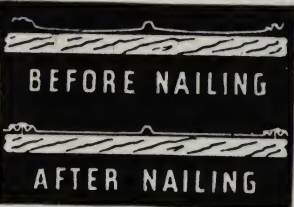

1 TWIN DRAINS prevent syphoning. They carry off any water that may seep or be blown through the laps.

2 TRIPLE CROSS CRIMPS stop all seepage at end laps and protect roofs from this common cause of leaks.

3 PRESSURE LIP makes the overlapping ends cling firmly together. High winds and rain are kept out.

4 TENSION CURVE holds the entire sheet snugly against the decking.

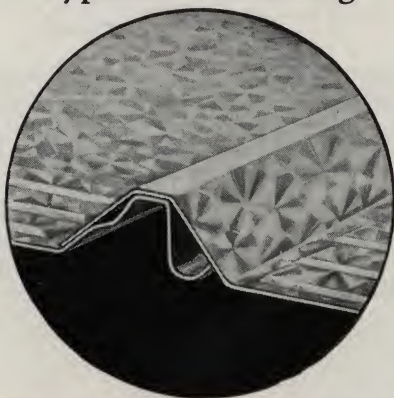

5 FLAT NON-SYPHON SEAMS make nailing easy. They look trim.

In laying Stormseal Roofing Sheets, the first sheet should be applied at the lower left gable end, with the Triple Cross Crimp at the bottom. Then lay the second sheet above the first, lapping it about 6 inches over the first sheet. Next lay the third sheet above the second, etc., until the first vertical row is finished, from eave to ridge.

After the first row from eaves to ridge is completed, apply each additional row in the same way. This makes an absolutely leak-proof roof, no matter what the weather.

Syphon Seal Roofing

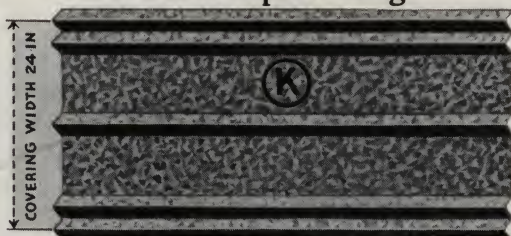

An excellent Drain Type Roofing at low cost. Sheets charged on the basis of 24" which is actual covering width.

Furnished in 5, 6, 7, 8, 9 and 10 foot lengths. 11 and 12 foot sheets also supplied at an extra charge of 10c per square.

Screw Shank Lead Headed Nails

The nail is threaded to make it turn as it is driven. It has the holding power of a screw. This nail is galvanized.

Same number of nails per pound as straight-shank nails.

Carried in stock in 1½", 1¾", 2 and 2½" sizes.

Small lots.....	28c per lb.
Keg lots.....	\$24.50 per keg

F. O. B. Dubuque, Iowa

Barbed Roofing Nails Lead Washers

Lead Washers per lb.....\$.32
Allow one-third lb. per square.

Galvanized Nails Per Pound
Small lots.....16c Keg lots.....14c

Sizes in stock— $\frac{7}{8}$ inch to $2\frac{1}{4}$ inch.

Regular galvanized roofing nails, allow
1 pound per square.

One-half Actual
Size.

Compressed Lead Headed Nails

The compressed lead head of these nails completely seals the holes made in galvanized roofing where the nails are driven through it. The $1\frac{3}{4}$ " size run 8700 to the keg. Stocked in $1\frac{1}{2}$ ", $1\frac{3}{4}$ ", 2", and $2\frac{1}{2}$ " sizes. These are bright, not galvanized.

Small lots, per lb.....\$.20
Keg lots, per lb......16 $\frac{1}{2}$

Ring Shank Lead Headed Nails

The nail is formed with raised ring shank (14 to the inch), as shown by the illustration. When it has been driven, it cannot pull or twist out. It keeps the roofing tight, and assures a lasting seal of soft lead. Inexpensive to buy, and easy to use. **Drives Without Rotation or Damage to the Head.** These are bright but can also be furnished in galvanized at a Net extra cost of 2c per lb. or \$2.00 per keg.

Carried in stock, $1\frac{1}{2}$ ", $1\frac{3}{4}$ ", 2 and $2\frac{1}{2}$ inch sizes.

Small lots.....\$24.00 Cwt.
Keg lots.....20.50 Cwt.

Zinclad Calk Screw Nails

A Non-Loosening, Leak Proof Nail for Metal Roofing.

Fabricated in One Piece.

Heavily Galvanized Coated.

Stock in $1\frac{1}{2}$ ", $1\frac{3}{4}$ " and 2 inch sizes.

Price per 100 lbs., any size.....\$24.50

All sizes put up in five pound packages, twenty packages per box. Less than full box lots, but in full size packages, two cents per pound higher.

THE KLAUER MONITOR

Klauwer Monitor Cupolas K-400 Series are made from heavy (24 gauge) galvanized steel and are finished with the best silver aluminum paint. They are furnished with a pressed shingle design in the base and with the corrugated storm band which adds to the beauty and also many times to the strength. On the cutaway section are shown the heavy braces in the head of the cupola. Also the heavy wood frame built into the top of base of cupola. This heavy frame is built in the cupola at the factory. The heavy sheet metal corner angles have the top end fastened to the wood frame with the lower end bearing on the roof. This makes the four heavy corner angles carry the load instead of the flat shingle section of the base.

Brooder House Ventilator

The two Brooder House Ventilators illustrated on this page are identical in construction with exception to the collar that is furnished to fit onto the roof of the building. These ventilators are made from heavy galvanized steel and finished with a high grade silver aluminum paint. They are made with an 8-inch flue and a 5-inch removable smoke cap. The ventilators are shipped with an extra collar in the top having a 4-inch hole in same. The use of 5-inch pipe merely requires the removal of this collar.

K-208—Each\$5.00

K-208—For Shed Roofs. Adjustable for Roof Pitches up to 20°.

K-308—For Round Roofs.

Our brooder house ventilators are designed upon a principle that has proven efficient after extensive tests. This ventilator is in substance a double-duty ventilator, offering a regular ventilator head plus a separate outlet for the stove pipe attachment which leads to the heater in the brooder house.

K-308—Each\$5.00

Packed one to a carton. Weight 8 lbs.

No Puff Chimney Caps

This device will take care of down draft trouble with poorly located chimneys. Ideal for Brooder Stoves, Tank Heaters, and Feed Cookers. Made from heavy galvanized sheets. Furnished regularly in the following sizes.

F. O. B. Dubuque, Iowa

*M*AY we urge you to send for a copy of our "Ventilatin' Book." Our very complete line of Ventilators and Cupolas are completely illustrated in this book, as well as special ventilating equipment for poultry houses, hog houses and feed houses. A complete line of roof and sidewall windows in metal are part of this equipment.

We would also be very glad to send you our large folder on the Monitor Ventilator shown on page 61. In this folder are many construction features that are brought to your attention in detail and there are schedules indicating the exhaust capacities, and charts that will assist you in accomplishing the proper amount of ventilation for given-sized areas.

Monitor Poultry House Foul Air Flues

(ONE PIECE)

Hinged at the joint this flue can be fastened out of the way in the summertime.

Klauwer Poultry House Foul Air Flues No. 12B and No. 18B are made from good grade heavy galvanized steel. They have a two-foot section on top end that fastens into the cupola and a six-foot section which is hinged near the ceiling so that it can be fastened open for summer ventilation. They are furnished with a damper so that they can be partly or entirely closed in cold weather. The standard 12B and 18B flue shown in cut will fit building with shed type and pitched type roofs where there is no mow space above. Where there is mow or loft, the upper section of flue must be long enough to reach from under side of ceiling to cupola. This section through loft must be insulated. All foul air flues should start from two to three feet above the floor. The corrugation of this one-piece flue is a special feature offering unusual rigidity.

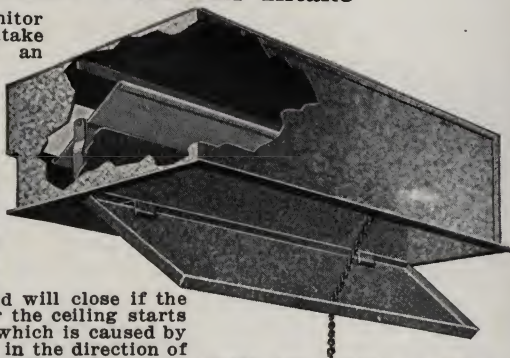

12B—12" flue, total length	
8' 0"	\$14.00
15B—15" flue, total length	
8' 0"	18.20
Extra for each additional foot in length:	
Add for 12", per foot.....	\$1.40
Add for 15", per foot.....	1.80

Klauwer Fresh Air Intake

Klauwer Monitor Fresh Air Intake No. K-100 is an

automatic bypass damper which is made of aluminum and operates with the slightest movement of air. The aluminum damper will admit the fresh outside air to pass into the building over

the damper and will close if the warm air, near the ceiling starts to back draft which is caused by sudden change in the direction of the wind or opening of a door. Fresh air intakes must be used to make the ventilating system work properly at all times. Klauwer Monitor Fresh Air Intakes No. K-100 are made to a standard and can be used in poultry house, hog house, or barn construction of any types where roof rafters or ceiling joists are spaced 24" on centers.

No. K-100 Monitor Fresh Air Intake, Price each.....\$8.40
Packed two in crate, 35 lbs. Packed three in crate, 50 lbs.

ROOF WINDOWS

Monitor Single Light Window

Monitor roof windows have gained their wide popularity because of their ease of installation, simplicity, and durability.

The frames are made from the best grades of galvanized copper steel. Patented anti-leak ribs.

Made in one size, 20 x 28 glass.

	Each

V E N T I L A T I O N

OF BARNs, HOG HOUSES, POULTRY HOUSES,
BROODER HOUSES, MILK HOUSES, GARAGES,
SUMMER COTTAGES, ETC.

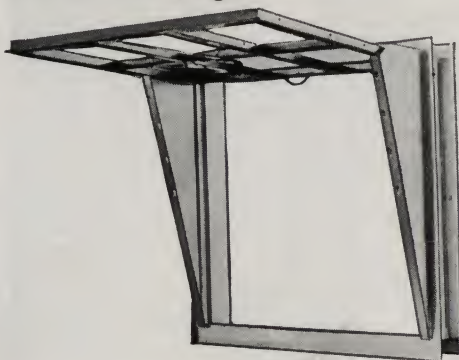

Low in first cost, easy to install, efficient in operation, DUO-VENT Frames offer indefinite service without maintenance cost. Set up ready for use in less than one minute. Heavy galvanized metal parts fasten together securely without nails, bolts, rivets or solder — never warp!

Provision is made for storm sash or screen, and all frames are equipped with a ½" drip. Regularly supplied for use with regular 1½" wood barn sash in sizes shown on page 60. Write for prices on sizes not shown.

Shipped K D in cartons of one-half dozen. Low freight rate.

Klauer Air Flow Windows

An improved ventilating barn window. Heavy rolled shape sash welded. Galvanized rust resisting frames. Easily operated. Will not swell in wet weather, or dry out and rattle in dry weather. Can be opened at top without being raised, allowing deflection of air along the ceiling line, or opened and raised in three positions, allowing air flow through top and bottom. Can also be fully opened and suspended from ceiling. Furnished complete with wings.

Wire clips to lock glass in place before puttying supplied with sash.

Prices do not include steel sash putty.

Putty required per 100 lights:

9 x 11	54 lbs.
9 x 13	60 lbs.
9 x 14	63 lbs.

Monitor Suction Ventilators

(Rotating Type)

Monitor Suction Ventilators are mechanically correct and are approved by leading architects.

The potential Ball Bearing Revolving device enables the Ventilator head to turn easily in the slightest breeze and yet is so strongly constructed that it will withstand the gale and work efficiently in all kinds of weather.

Storm Proof.

"CIRCLE K" PERFECTION CEILINGS

Metal ceilings are attractive and economical. For these reasons they are again coming into popular use. Retail merchants are realizing the advantage of having store interiors that are clean and inviting—metal ceilings offer just that—they relieve the barren appearance of plaster ceilings.

You will like to handle the Klawer "Perfection" ceiling, because they are so easy to install—the perfection nailing button brings each sheet to a position where it fits as it should.

There are many more patterns than those illustrated in this catalog. Write for our metal ceiling catalog.

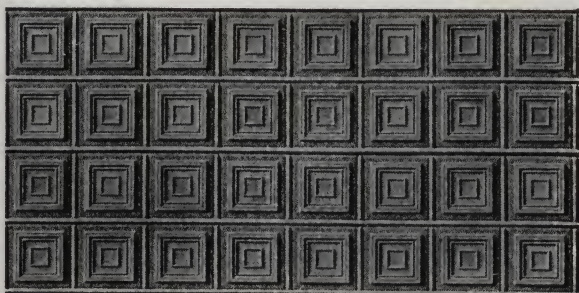

Plate No. 6300. Sheet size 24"x 96"

This pattern is in 12 inch multiples, and is adapted to any class of buildings. A very conservative pattern which is easily painted and cleaned. Makes a very attractive job at a low cost.

Price per sq., painted 1 coat, crated, \$8.60, bundled, \$8.40

F.O.B. Dubuque, Iowa

Ceiling Plate No. 6200

Adjustable Self-Furring

Offers an attractive design for use in factories, garages, storerooms, warehouses, etc., at a remarkably low material and erection cost.

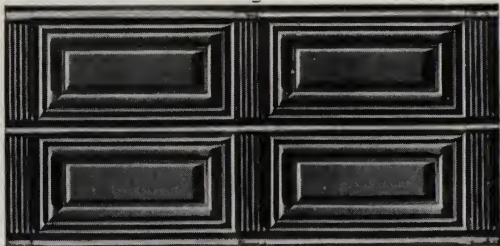

Illustration Shows a One-half Section.

Sheet size 24 x 98 inches. Covers 24 x 96 inches.

Large beads running lengthwise on each side and center give strength and rigidity. Erection is simple, as plate is nailed only along each side. Design of pattern permits adjustment of two inches lengthwise.

Cornice and filler need not be used with this plate. However, where desired, the use of Cornice No. 5066, with a 6-inch filler, will be found suitable.

Price per sq., painted 1 coat, crated, \$8.60; bundled, \$8.40

Continuous Plates

Plate No. 2021—Sheet Size 24 x 96 Inches.

Price per sq., painted 1 coat, crated, \$8.40; bundled, \$8.20

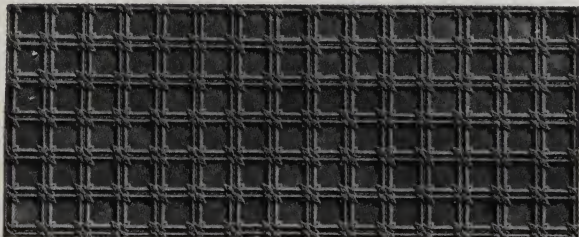

Plate No. 5020—Sheet Size 24 x 96 Inches.

Price per sq., painted 1 coat, crated, \$8.60; bundled, \$8.40

When ordering, see Note on page 75.

For Complete Ceiling Line See Large Catalog D-37

F. O. B. Dubuque, Iowa

Continuous Plates

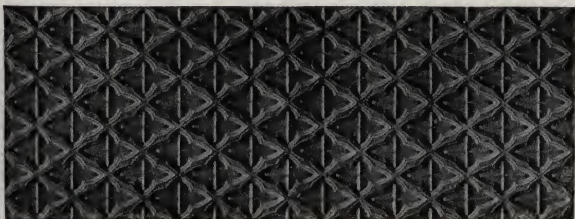

Plate No. 2020—Sheet Size 24 x 96 Inches.

Price per sq., painted 1 coat, crated \$8.40, bundled, \$8.20

Plate No. 5099—Sheet Size 24 x 96 Inches.

Price per sq., painted 1 coat, crated \$8.40, bundled, \$8.20

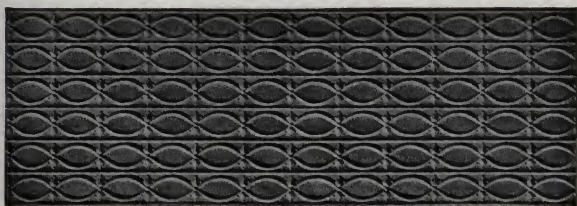

Plate No. 6100—Sheet Size 24 x 96 Inches

Price per sq., painted 1 coat, crated \$8.20, bundled \$8.00

F. O. B. Dubuque, Iowa

Note:—All the above plates will cover 24x96 inches including end laps and can be applied directly to joists if spaced 12, 16 or 24 inches on centers. This eliminates the use of furring strips and saves labor erecting.

For Complete Ceiling Line See Large Catalog D-37

Tanks shipped nested take a lower rate. The RE-"B" tanks are made to nest with the regular RE tanks, giving you the advantages of many nesting combinations.

Corrugated construction will withstand any water pressure. Corrugations also allow for contraction and expansion due to heat and frost.

Elastic packing in seams makes leakage impossible when packing is thoroughly soaked.

**ALL SIZES EQUIPPED
WITH 1 INCH DRAIN PLUG**

Unbreakable 14 Gauge Steel Cover with 12 Gauge Heavy Pressed Hinges. Clean and convenient—Foot operated.

Underground—out of sight, yet conveniently located; its installation requires only the digging of a hole in the ground. The inner can is removable. The Klauer underground refuse receiver is made in 10 and 15 gallon sizes. Both are the same size in diameter. Aside from the convenience, an underground refuse receiver is sanitary. The actual container of the refuse is below ground and covered with a tight fitting lid. It will not be an object of prowling dogs or cats and there is no attraction for flies and insects. Enjoy the cleanliness, convenience and new unbreakable feature of the Klauer underground refuse receiver.

Klauer-Kote Metal Paint

This is an exceptional paint for efficient protection of metal surfaces, even when subjected to the most severe exposure and temperature changes. In addition to being waterproof, it is alkali-proof as well as acid and fume resisting. Klauer-Kote contains graphite and red lead pigment, is long in oil, all of which makes it extremely elastic, yet tough enough to withstand scuffing and scratching.

Although primer is not necessary, if a two-coat system is desired on galvanized iron or other sheet metal surfaces, use Klauer's Galvanized Iron Primer.

Coverage is approximately 600 square feet per gallon, one coat.

	5 gal. cans per gallon	1 gal. cans	1 qt. cans
Y-509 Gray.....	\$5.64	\$6.04	\$1.80
Y-510 Green	5.64	6.04	1.80
Y-511 Red	5.08	5.48	1.68
Y-512 Black	5.08	5.48	1.68

**1 Gallon Cans, 4 cans per case and Quart Cans, 12 cans per case.
Broken case lots, 10% higher.**

Klauer Galvanized Iron Primer

A superior primer for Galvanized or other metal surfaces. It requires no previous etching with acids and eliminates peeling experienced with ordinary materials. Dries hard overnight for recoating. Coverage approximately 600 square feet per gallon, one coat. Furnished in gray color only.

	5 gal. cans per gallon	1 gal. cans	1 qt. cans
99-E-17 Gray.....	\$6.20	\$6.60	\$1.96

**1 Gallon Cans, 4 cans per case and Quart Cans, 12 cans per case.
Broken case lots, 10% higher.**

Aluminum Paint

Genuine Alcoa Albron Aluminum Bronze Extra Fine Varnish Grade Gilsonite Asphalt Vehicle. Put up in double compartment cans. Highest quality. Full measure.

5 Gallon Cans, gal.....	\$4.80
1 Gallon Cans, case lots of four, gal.....	5.30
Broken case lots, gal.....	5.60

Red Metal Paint

Highly efficient as preservative coating for all types of metal surfaces.

It is unsurpassed for resistance to weather exposure.

It has excellent hiding power, one coat covering, but two coats are recommended for greater wearing and finishing results.

It dries with an excellent lustre.

5 Gallon Cans, gal.....	\$2.70	1 Gallon Cans, gal.....	\$2.90
